Facts about influenza and the flu vaccine

In 2024, the flu caused...

78,375 cases in Queensland which is enough people to fill the Gabba twice.

6,877 hospital admissions in Queensland which is the population of a small town like Roma.

Almost 1,000 deaths in Australia which is the number of students at a large city high school.

Getting a flu vaccine...

Lowers the risk of getting the flu by **50-60%**.

Reduces hospitalisation risk from the flu by 68%.

Protects people around you, including those more vulnerable to serious flu illness, like babies and young children, older people, and people with certain chronic health conditions.
