| DATE AND TIME | DESCRIBE YOUR PAIN (e.g. how long it lasts, where it is, whether it moves, what it feels like - dull, sharp, stabbing) | RATE YOUR PAIN (0-10, see overleaf) | WHAT MADE YOUR PAIN WORSE? | WHAT HELPED YOU GET THROUGH THE DAY? (medicine and non-medicine such as meditation, exercise etc) | DESCRIBE YOUR ACTIVITY LEVEL AND MOOD (Has the pain affected your daily life, including sleep, work social life etc) | COMMENTS (e.g. problems with medicines, how your pain affects your daily life - sleep, mood, work etc.) |
What is a pain diary?
A pain diary is a written record of how your pain affects your daily activities. It helps you to describe to your healthcare team how your pain has been affecting you over time.

A pain diary also records how medicines, other therapies and your activities affect your pain levels throughout the day.

Why should I keep a pain diary?
A pain diary can help you and your healthcare team:

▷ understand what makes your pain worse and what helps to relieve your pain
▷ track your response to your pain management plan, including changes in your medicines or other therapies.

When should I use a pain diary?
Use your pain diary as often as recommended by your doctor or pharmacist. This may include when you have ongoing pain, changes in your activity levels or changes in your medicines.

The information that you record will help you and your healthcare team prepare and guide your pain management plan. If your pain is under control you may not need to use the diary as often.

The more information you record in your pain diary, the more helpful it will be for you and your healthcare team.

How do I complete a pain diary?
Record all the information that is relevant to your pain in the diary over the page. You may not need to fill out all columns each time.

To complete the diary use the rating scale (below) to rate your activity. A zero (0) means no pain and a ten (10) means worst possible pain. Select the number that best describes your pain.

<table>
<thead>
<tr>
<th>No pain</th>
<th></th>
<th>Worst possible pain</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>1</td>
<td>2</td>
