There are 5,723 community pharmacies in Australia\(^1\). On average, every person visits a community pharmacy 18 times each year, in metropolitan, rural and remote locations\(^2\) Community pharmacies are the most frequently accessed and most accessible health destination, with over 453 million individual patient visits annually and the vast majority of pharmacies open after-hours, including weekends\(^3\).

In 2018-19, under the PBS and RPBS, community pharmacies dispensed almost 211 million Government subsidised (Above Co-Pay) prescriptions\(^4\). Pharmacists are one of the most trusted professions along with nurses and doctors. Public opinion surveys have shown that 84% of adults trust the advice they receive from pharmacists\(^5\). More than 94% of pharmacies nationwide have achieved quality accreditation\(^7\). More than 90% of Australian Pharmacies use the Electronic Transfer of Prescriptions (ETP) platform of which 4,300 pharmacies use eRx every day\(^8\).

In capital cities, 97% of consumers are no further than 2.5km from a pharmacy. In regional areas, 65% of people are within 2.5km of a pharmacy\(^10\). 65% of patients say they use one pharmacy for everything or at least one category of product/service. 33% of patients state they were driven by convenience of location\(^6\). Australia’s system of community pharmacy and Pharmaceutical Benefits Scheme are recognised as world-leading.
VITAL FACTS ON COMMUNITY PHARMACY

The Guild estimates the Government will save $20 billion through PBS reforms during the Sixth Community Pharmacy Agreement. 

As at 30 June 2019, there were 31,955 registered pharmacists in Australia of which 62.8% are women and over 60% are under 40 years of age.

Six Community Pharmacy Agreements have been negotiated between the Government and the Guild, underpinning pharmacies and the PBS over 25 years.

Community pharmacies provide a national network of National Diabetes Services Scheme access points for the 1,309,070 Australians with diabetes who have registered with the NDSS.

In 2017-18 there were 229,080 potentially preventable public hospitalisations and 64,086 private hospitalisations from chronic conditions (excluding diabetes). Medicines adherence is an important role for community pharmacists.

Between June 2016 and May 2017 there were 14.6 million dose administration aids provided by community pharmacies to patients to assist them to remain living at home.

Pharmacies support public health initiatives such as Opioid Replacement Therapy and needle and syringe programs and participating in the Return of Unwanted Medicines Program improving social, economic and health outcomes.

Community-pharmacist led medication-adherence interventions have improved adherence rates by 9.3% and reduced health system costs by $1.9 billion.
