Better access and peace of mind

When you are caring for someone
near end-of-life it is important you can
easily access the medicines they need.

The Palliative Care Medicines Pharmacy Network can help you

Find your nearest network pharmacy at: findapharmacy.com.au/palliative-care-SA

The South Australian Government has committed funding to support a network of community pharmacies across regional and metropolitan South Australia to improve access to an agreed core list of palliative care medicines, including urgent after hours access in urgent situations.

Improved access to palliative care medicines and support will ensure people approaching end-of-life can receive the treatment they need at home if they wish and help reduce avoidable Emergency Department presentations to access palliative care medicines.

The Palliative Care Medicines Pharmacy Network will always stock the most common palliative care medicines. This means you won't have to spend time shopping around pharmacies to access the medicines you need, particularly if your usual pharmacy does not have stock available.

Help shape this important initiative by sharing your experience through a short survey.
