

# VITAL FACTS ON COMMUNITY PHARMACY

## The Pharmacy Guild of Australia

Australia's system of community pharmacy and Pharmaceutical Benefits Scheme are recognised as world-leading.

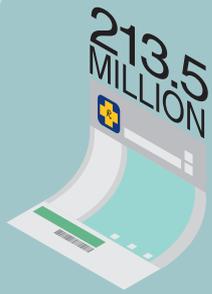

There are 5,822 community pharmacies in Australia<sup>1</sup>

On average, every person visits a community pharmacy 18 times each year, in metropolitan, rural and remote locations<sup>2</sup>

Community pharmacies are the most frequently accessed and most accessible health destination, with over 461 million individual patient visits annually and the vast majority of pharmacies open after-hours, including weekends<sup>3</sup>

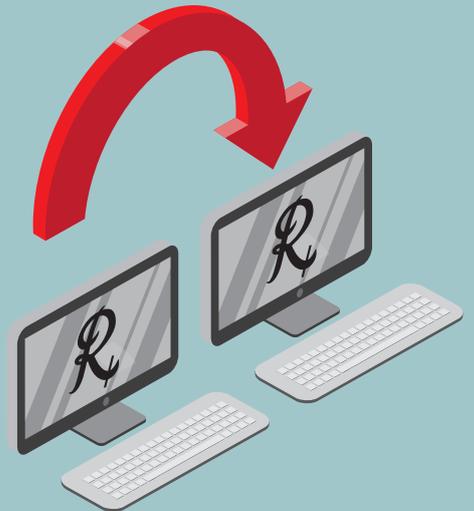

In 2019-20, under the PBS and RPBS, community pharmacies dispensed almost 213.5 million Government subsidised (Above Co-Pay) prescriptions<sup>4</sup>

Pharmacists are one of the most trusted professions along with nurses and doctors. Public opinion surveys have shown that 84% of adults trust the advice they receive from pharmacists<sup>5</sup>

More than 94% of pharmacies nationwide have achieved quality accreditation<sup>7</sup>

As at 30th June 2020, 99.9 per cent of PBS or RPBS prescriptions are now claimed electronically online<sup>9</sup>.

In capital cities, 97% of consumers are no further than 2.5km from a pharmacy. In regional areas, 65% of people are within 2.5km of a pharmacy<sup>10</sup>

65% of patients say they use one pharmacy for everything or at least one category of product/service. 33% of patients state they were driven by convenience of location<sup>6</sup>

# VITAL FACTS ON COMMUNITY PHARMACY

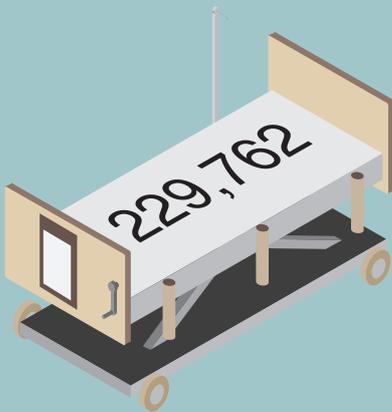

Community pharmacies have dispensed 632,132 ePrescriptions for patients and have issued 478,876 repeat tokens to patients<sup>8</sup>.

As at 30 June 2020, there were 34,512 registered pharmacists in Australia of which 63.1% are women and over 60% are under 40 years of age<sup>11</sup>.

Seven Community Pharmacy Agreements have been negotiated between the Government and the Guild, underpinning pharmacies and the PBS over 30 years.

In 2018–19, 744,845 of all hospitalisations were classified as potentially preventable. Of these, 229,762 potentially preventable public hospitalisations and 64,447 private hospitalisations were due to chronic conditions (excluding diabetes). Medicines adherence is an important role for community pharmacists<sup>13</sup>

Community pharmacies provide a national network of National Diabetes Services Scheme access points for the 1,366,857 Australians with diabetes who have registered with the NDSS<sup>15</sup>

Between June 2016 and May 2017 there were 14.6 million dose administration aids provided by community pharmacies to patients to assist them to remain living at home<sup>14</sup>

Pharmacies support public health initiatives such as Opioid Replacement Therapy and needle and syringe programs and participating in the Return of Unwanted Medicines Program improving social, economic and health outcomes

Community-pharmacist led medication-adherence interventions have improved adherence rates by 9.3% and reduced health system costs by \$1.9 billion<sup>12</sup>
