

**For the duration of the 2025 Free Flu Vaccine Program in Queensland, no Queensland resident is to be charged for a flu vaccine.**

Where funding cannot be claimed for administration of a flu vaccine through the NIPVIP Program, please claim through the Free Flu Program.

# MedAdvisor Solutions™

If your pharmacy is planning to claim payment for vaccines administered through MedAdvisor, follow the below steps to claim through the appropriate *Vaccine Funding Type*.

1. This option is for all patients who are **not** eligible to receive a NIP-funded vaccine and would normally pay privately for a flu vaccine. **The state will pay.**
2. These options are for patients who are eligible to receive a NIP-funded vaccine but because of their age (<5 years) or the location of the vaccination (i.e. **not** in the pharmacy or in an aged care or disability home) the pharmacy cannot claim remuneration from the NIPVIP Program. **The state will pay.**
3. This option is for patients who are eligible to receive a NIP-funded vaccine and the vaccine is given to a patient >5 years of age and in a location allowed in the [NIPVIP Program Rules](#). **The Commonwealth will pay.**

**Please note – where Commonwealth NIPVIP Program funding is available, the pharmacy must NOT claim remuneration from the State Free Flu Program.**
